

POWER WIPES

Powerful cleaning cloths for universal use

Product description

Power Wipes are extra-heavy and large cleaning cloths impregnated with a strong cleaning agent.

Power Wipes are used on the surface directly from the packaging and without water. The wipes are silicone-free and leave no sticky residue on the surface.

Power Wipes are packed per 70 in a sturdy bucket and each wipe has a size of 12x30cm. In addition, the cloths have an abrasive action that supports the removal of stubborn dirt.

Power Wipes contain only non-irritating ingredients and glycerine that prevents skin dehydration and leaves skin feeling smooth.

Power Wipes comes in a recyclable and reusable bucket. It is possible to order refills for reuse in these buckets.

Use

Power Wipes are suitable for removing heavy soiling in workshops and industrial environments. These include paint residues, inks, adhesives, sealant residues, oils, soot, lubricants and many other contaminants.

Characteristics

- Well-sealing bucket to prevent drying out
- Pleasant fragrance
- Very powerful due to the abrasive effect
- Individual rolls available as refills
- Moisturises the skin
- No water needed

Technical data

Colour:	Orange cloths in a white canister
Dimensions:	12 x 30 cm
Material:	Polypropylene
Contains:	non-irritating solvents, glycerine, citrus scent

Application conditions

Power Wipes can be used anytime, anywhere.

Instructions

1. Before use, open the bag and turn the roll over to improve distribution of the liquid. Remove a cloth from the centre of the roll through the opening.
2. Remove a single cloth from the bucket and use directly on the soiled surface. Rinsing is not necessary.
3. Throw used cloths in the waste bin. Do not flush down the toilet.
4. Keep packaging closed as much as possible to prevent drying out.

Packaging

70 cloths per bucket and refill.

Storage

In original sealed bag, the wipes have a shelf life of at least 24 months. Store in tightly closed packaging in a dry place. Keep out of the reach of children. After opening, keep the container closed as much as possible to prevent dehydration.
